

ADD2016-00148

Miromar Lakes LLC

Environmental Sciences Zoning Review

1. Label on the MCP where the rip rap will be used.
2. Label cross section A-A. Currently, a cross section has been provided but the MCP doesn't indicate where this lake slope is being used.
3. Label the compensatory planting area(s) and provide the plant specifications for the plant material.
4. A landscape buffer is labeled on the MCP. Is this associated with an optional residential fence? Please specify. If not required by code, please remove from MCP.
