**RE: Miromar Lakes Boat Ramp Facility
ADD2020-00072
HM Project No. 2020.014**

Dear Mr. Badamtchian:

This letter is in response to your correspondence of July 9, 2020 for the above referenced project. The following are responses to your comments.

Environmental Review:

1. The project boundary/limits of the Final Plan Approval depicted on sheet 2 of 3 of the site plans includes only the 300 linear feet of rip-rap being proposed. The compensatory littoral shelf is not provided within the limits of the project boundary/limits of FPA. Please revise to depict the compensatory littoral shelf within the project limits.

RESPONSE: Per our phone conversation, a minor change to DOS2017-00016 will be submitted to show the required littoral plants to be installed as part of Phase 2D. We have added a note to the MCP to reflect the action. A similar note has been added to the Master Site Plan for Development Order approval.

If you need further information, please do not hesitate to contact me at 239-985-1200.

Very truly yours,

HOLE MONTES, INC.

Charles L. Krebs, PE
