b. Site Development Regulations

Attached as Exhibit D.

3. Development Permits

County development permits do not establish a right to obtain permits from state or federal agencies. Further, it does not establish liability on the part of the County if the developer: (a) does not obtain requisite approvals or fulfill obligations imposed by state or federal agencies; or (b) undertakes actions that result in a violation of state or federal law.

4. Hurricane Preparedness

To mitigate future hurricane damage and loss of life, and to ensure compliance with Lee Plan objectives, developer must:

- a. Establish a homeowners' or residents' association. The organization must provide an educational program with Emergency Management staff on an annual basis that describes risks of natural hazards through literature, brochures, and speakers

for Hurricane Awareness/Preparedness Seminars. The intent is to educate residents of the actions necessary to mitigate dangers inherent in these hazards;

- b. Formulate an emergency hurricane notification and evacuation plan, subject to approval by the Lee County Office of Emergency Management; and
- c. Comply with LDC §2-481 *et seq.* hurricane preparedness and impact mitigation, if required.

5. Model Homes, Model Units, Model Display Centers

Model units, model homes, model display centers, and real estate sales are subject to the following:

- a. Each model must be a unique example. Multiple examples of the same unit are prohibited.
- b. All Model Home Sites, Model Display Centers, or Model Groups must be designated on development order plans. Parking areas must be buffered with a single-row hedge and tree canopy.
- c. Prior to model home construction, model home lots must be shown on a preliminary plat. Developer must file the preliminary plat concurrently with the local development order application. Model homes must comply with setbacks set forth in Exhibit D.
- d. Model homes or model units are limited to no more than 15 within the development at one time.
- e. Real estate sales are limited to the sale of lots or units within the development only.
- f. Real estate sales are limited to temporary real estate trailers, model units, model display centers, and the Recreational Amenity area (Tract RA).
- g. Hours of operation for models and real estate sales are limited to 8 a.m. to 8 p.m. daily.
- h. Model homes and real estate sales will be valid for up to 5 years from the date of issuance of a certificate of occupancy of a model home.

6. Buffers

a. Southern Property Line

Development order plans must depict a 30 foot wide buffer along the southern property line (excluding indigenous preserve area) with the development order establishing lots adjacent to this property boundary. The 30 foot wide buffer must abide by the following:

- i. Contain a berm with a wall or fence at least eight feet in height, except where it encroaches in the upland preserve as shown on the MCP;

- ii. Vegetation installed between the southern property line and the eight foot berm/wall or fence combination must contain ten oak trees (*Quercus virginiana*) per 100 linear feet and a double hedge row;
- iii. Trees must be 10 feet, two inch caliper, and four-foot spread;
- iv. Shrubs must be at least 36 inches in height at time of planting and create a visual screen; and
- v. Existing indigenous native vegetation may be counted toward the vegetation requirements of this condition.

b. Buffer on Lands Abutting Buckingham Road

Development order plans must depict an enhanced 25 foot Type-D buffer along Buckingham Road that includes 10 trees per 100 linear feet (must include live oaks, no palms) between the eight foot berm/wall or fence and the Buckingham Road right-of-way.

c. Buffer Adjacent to Portico and Internal Right-of-Way

Development order plans must depict an enhanced 20 foot wide Type-C buffer where internal roads are less than 125 feet from an adjacent single family subdivision. A berm with a wall at least eight feet in height may be constructed closer than 25 feet from the abutting property if the following plant material is proposed:

- i. Between the wall/berm and the property line - Ten South Florida Slash Pine (*Pinus elliottii* var. *densa*) and 18 shrubs per 100 linear feet; and
- ii. Between the wall/berm and the internal right-of-way –
  - 1) Five shade trees per 100 linear feet;
  - 2) Clusters of three South Florida Slash Pine (*Pinus elliottii* var. *densa*) between the shade trees; and
  - 3) 18 shrubs per 100 linear feet.

- d. All required buffers must utilize 100% native vegetation.

7. Protected Species

The development order must provide a Species Management Plan explaining how the cardinal airplant (*Tillandsia fasciculata*) and wild pine airplant (*Tillandsia utriculata*) will be protected during development and exotic removal.

8. Agricultural Uses

Existing bona fide agricultural uses in the form of cattle pasture and the raising of hay may continue on the property subject to the following:

a. Termination of Agricultural Use.

Agricultural uses must terminate on project areas receiving development order approval for vertical development and prior to county issuance of a vegetation removal permit. Development order approvals for plats, infrastructure improvements, landscaping, surface water management, or other non-vertical development do not trigger termination.

b. Additional Clearing Prohibited.

Clearing of native trees or other native vegetation, including understory, in agricultural areas is prohibited. Existing areas of bona fide agricultural use that include existing grass pasture(s) may be mowed, but may not be cleared or expanded. This prohibition does not preclude County approved requests for removal of invasive exotic vegetation.

c. Proof of Termination.

Upon approval of a local development order for vertical development and prior to issuance of a vegetation removal permit, the property owner must provide written proof of the following, subject to approval by the County Attorney's Office:

i. Affidavit.

Sworn affidavit from the property owner confirming:

- 1) Date agricultural uses ceased;
- 2) Legal description of the property subject to the development order approved for vertical development;
- 3) An affirmative statement acknowledging and agreeing agricultural uses are illegal and prohibited on the property, and that the owner covenants with the County they will not allow agricultural uses to resume until the property is rezoned to permit agriculture; and
- 4) The affidavit constitutes a covenant between the property owner and the County binding on the owner and its successors. The covenant must be properly recorded in the public records of the County at the owner's expense.

ii. Termination of Tax Exemption.

Termination of the agricultural tax exemption for portions of the property subject to development order for vertical development. Proof of termination must include a copy of the request to terminate the tax exemption submitted to the Lee County Property Appraiser.

9. Right-of-Way Dedication

Developer voluntarily reserves a 20 foot wide strip along Buckingham Road for county right-of-way purposes. Developer may dedicate the strip by recording an instrument (i.e.

deed or plat) that grants or dedicates to the County an exclusive easement for right-of-way purposes. Developer will be eligible for 100% road impact fee credits for land dedicated for Buckingham Road. If Developer grants the easement via a plat, the dedication must be clear and unambiguous. Use of the label "Future Right-of-way" is not acceptable. The dedicated area may not be used for required development buffering or any other non-county right-of-way improvements. Developer must complete dedication prior to issuance of the first building permit allowing vertical construction within the project.

10. Access to Buckingham Road

- a. The MCP and local development order must depict a minimum 70-foot-wide divided entrance on Buckingham Road that includes a 14-foot wide median with two 11-foot wide lanes on both sides of the median for ingress and egress.
- b. Local development orders must include a second access point on Buckingham Road. This access will be an egress point for residents only and an ingress/egress for emergency vehicles. At least 25 feet of separation is required between the gate and the Buckingham Road right-of-way. Access for emergency services to be provided by a Knox Box.
- c. Developer must provide written documentation from the Fort Myers Shores Fire District indicating the access points are acceptable and provide adequate access for emergency vehicles.

11. Commercial Uses and Consumption on Premises

- a. Commercial uses are limited to a maximum of 7,500 square feet of floor area for the entire development.
- b. Commercial uses are for residents and guests only, not open to the general public.
- c. Hours of operation for consumption on premises are limited to 7:00 a.m. to midnight, daily.

12. Public School Use

- a. If the School Site Reserved Area is conveyed to the Lee County School District, this zoning approval may be amended administratively to remove the 13-acre parcel from the MCP. The deletion of the school site from the MCP will not affect the right to develop 1,015 single-family dwelling units on the remaining portion of land covered by the MCP.
- b. If not conveyed, the School Site Reserved Area may be developed with single-family and accessory uses consistent with the Property Development Regulations for R-1, R-2, or R-3 and the enhanced buffer along Buckingham Road, with an Administrative Amendment.
- c. Density for the RPD remains limited to 1,015 dwelling units even if the School Site Reserved Area is utilized for residential development.

13. Natural Resources Conditions

Development order plans must include:

- a. A map depicting locations of free-flowing wells. Wells that are not part of an irrigation system or designated groundwater monitoring network must be permanently plugged and abandoned consistent with Lee County Code of Ordinances 32-99.
- b. A Water Quality Monitoring Plan approved by the Lee County Division of Natural Resources. The Plan must establish:
  - i. Overall goals and objectives of the Plan;
  - ii. An outfall monitoring schedule during "wet" season of June through October for Field Temperature, Total Kjeldahl Nitrogen, Total Nitrogen, Chlorophyll A, Nitrite, Nitrate, Phosphorus, Turbidity, and Stage;
  - iii. A baseline monitoring event prior to construction commencement;
  - iv. Provision of water quality monitoring data to the Division of Natural Resources annually for at least 5 years, including a comparison of State water quality standards, plots of parameters, and recommendations. Developer may amend water quality monitoring and reporting requirements by written request if State water quality standards are met or exceeded for five consecutive years. The Division of Natural Resources must approve Developer's written request. Results must be reported as an Electric Data Deliverable (EDD) in a format the Division of Natural Resources approves; and
  - v. A contingency plan if an exceedance of State Water Quality Standards is discovered, including notification to impacted residents and applicable authorities.

SECTION C. DEVIATIONS:

1. Deviation (1) seeks relief from the LDC §10-416(d)(6) requirement to provide a combination berm and solid wall eight feet in height not less than 25 feet from the abutting property with landscaping between the wall and abutting property of a Type "C" buffer (five trees and 18 shrubs per 100 linear feet), to allow landscaping and a three foot high berm/five foot high wall combination located closer to the abutting property.

This deviation is APPROVED SUBJECT TO Condition 6.

2. Deviation (2) seeks relief from the LDC §10-415(b)(1)(a) requirement that developments provide 50 percent open space through onsite preservation of existing native vegetation communities, to allow 17.3 acres of existing native vegetation communities to be maintained onsite.

This deviation is APPROVED SUBJECT TO the condition that the development order must depict 105.06 acres open space comprised of 83.35 acres general open space and 21.71 acres indigenous open space that includes 150% upland credits for upland indigenous area #1.

3. Deviation (3) seeks relief from the LDC §10-296(e)(2)(h)(5) Table 15 Suburban Local Streets requirement that residential land uses have 10 foot travel lane, 5 foot planting strip, and 5 foot pedestrian facility on both sides of the roadway, to allow a roadway cross-section with 10-12 foot travel lane, no planting strip, and a 5 foot pedestrian facility on one side of the primary road and village road.

This deviation is APPROVED.

4. Deviation (4) seeks relief from the LDC §10-296(e)(2)(h)(5) Table 15 Suburban Local Streets requirement that residential land uses have 10 foot travel lane, 5 foot planting strip, and 5 foot pedestrian facility on both sides of the roadway, to allow a roadway cross-section with 10-12 foot travel lane, a 5 foot planting strip, and a 5 foot pedestrian facility on one side of the primary road at the community entry.

This deviation is APPROVED SUBJECT TO Condition 10.

5. Deviation (5) seeks relief from the LDC §10-285 requirement of 660 feet of access connection separation within a future Suburban future land use category on a principal arterial, to allow 738± feet from the primary access to the proposed second egress and 503± feet from the proposed egress to the existing access to the north.

This deviation is APPROVED.

6. Deviation (6) seeks relief from the LDC §10-296(k)(1) requirement that all dead end streets be closed at one end by a circular turnaround, to allow the road to terminate at a residential driveway.

This deviation is APPROVED SUBJECT TO the condition that dead-end portion of the roads shall serve a maximum of two residential lots.

7. Deviation (7) seeks relief from the LDC §10-418(1) requirement that shorelines be sinuous, to allow some of the stormwater management ponds to be more rectangular than sinuous.

This deviation is APPROVED SUBJECT TO the condition that development order plans must include a detailed plan of planted littoral shelves for non-sinuous lakes depicting littoral plants installed in a serpentine or undulating design to simulate a sinuous shoreline.

Note 2: For Corner Lots, the secondary street setback is reduced to 5 feet to function as a side yard.

Note 3: Where lots abut a waterbody, setback is measured from the rear lot line.

Note 4: Lot dimensions and setbacks only apply to a residential lot intersecting with a dead end ROW consistent with the location of Deviation 6.
